MX Player Pro is hands-on at the moment. MX Player can play almost any video and audio format you throw at it, without breaking a sweat. That combined with features such as background playback, gesture controls, sleep timer, and many more, makes MX Player the absolute winner. However, the developers behind MX Player had to remove a couple of codecs from the app due to some legal restrictions. Best MX Player Alternatives For Android in 2021 As a result of the above, MX Player lost the ability to play media formats such as AC3, DTS, MLP, TrueHD, and a few more, at least officially. But guess what. You can manually download MX Player Codec files (both zip and APK files are available) and easily enable support for all the above-mentioned media formats. In this guide, we are bringing you all the available MX Player Codec for download. Added to the downloads, we have also included a nifty little guide on how to install MX Player Codec files to help you out in the process. If you do not know already which version to download, simply follow these instructions: Check which version you need by going to Settings > Decoder > General. Once you are here, in the Custom Codec tab you will be shown which codec is needed (x86, tegra2, tegra3, neon, etc.). Note: If you are unsure, simply download the All-In-One version (AIO). MX Player Custom Codec Zip Files Download The codec files work best with the latest version of MX Player. So, please download the latest version of MX Player. SEE ALSO The 5 Best Digital Scale Apps for AndroidPlease click below to download Zip codec files for MX Player and MX Player Pro: MX-NEON-CODEC.zip MX-NEON-64-CODEC.zip MX-AIO-CODEC.zip MX-X86-CODEC.zip MX-x86-64-CODEC.zip MX-TEGRA3-CODEC.zip MX-TEGRA2-CODEC.zip Also, make sure to download MX Player Pro APK latest version and MX Player for PC/Windows Laptop from our site. MX Player Custom Codec APK Files Download Please click below to download APK codec files for MX Player and MX Player Pro: ARM V7 NEON CODEC 1.9.20.apk TEGRA CODEC 1.9.19 BETA.apk ARM V7 CODEC 1.9.19 BETA.apk X86 CODEC 1.9.19.apk How to Install MX Player Codec Files? If you had downloaded the MX Player Codec files via computer, make sure to copy/move them to your Android device to proceed with the installation. You can follow any of the below methods which suits your needs best. Method 1 Using a file manager of your choice, move the MX Player Codec Zip file the root of your internal storage. Which means, outside of all the folders.Now, simply go to your home screen/app drawer and open MX Player. If everything is followed correctly, the player will automatically detect the codec zip file and will prompt you to install the same. Simply click 'OK'.The installation will be done automatically and the app will restart. Now you should be able to play all media formats without any issues. Method 2 Open MX Player on your phone. Go to Settings > Decoder > General > Custom Codec. Now you will get a dialog box showing your internal storage. Simply navigate to the path where you have stored the MX Player Codec zip file and select the same. The select codec zip will be installed and the app will automatically restart. SEE ALSO Top 8 Internet Texting Apps for AndroidFrequently Asked Questions What is a MX Player codec? MX Player Codec is a code file which contains the necessary information to make MX Player run on devices with ARMv7 NEON CPUs. If you are one of those with this type of device, you will need the MX Player codec to watch videos with unsupported video format. How to download MX Player codec? Visit MX Player Codec to download the necessary codec file. There are multiple codec files available. Choose the one you need from the list and download the same. You can choose from a zip file or an APK file. Once you click on the button, you will be taken to the download screen from where you can download the files. How to install MX Player codec? There are two ways: First method If you have the zip file in internal storage (in download or Bluetooth section), then keep it there only.Open MX Player. If it is compatible with the codec pack you have downloaded, the App it will automatically tell you to install the codec pack found in the storage. Just click ok.The App will restart, and the pack will be installed. Now you can enjoy audio to every video, without any glitch. Second Method Open MX Player on your smartphone.Open settings >decoder >general >custom codec.A dialog box will appear for the navigation of the codec pack. Now open the folder in which the codec pack is installed. You will see the zip file: click on it.If you have selected the right zip file, the App will restart. How to change MX Player codec? You need to have a new codec ready. Get it from the MX Player Codec page. Once you have downloaded the codec, it's just going to be like installing a new one. Follow any of the two methods below: SEE ALSO Top 9 Measuring Apps for AndroidFirst method If you have the zip file in internal storage (in download or Bluetooth section), then keep it there only.Open MX Player. If it is compatible with the codec pack you have downloaded, the App it will automatically tell you to install the codec pack found in the storage. Just click ok.The App will restart, and the pack will be installed. Now you can enjoy audio to every video, without any glitch. Second Method Open MX Player on your smartphone.Open settings >decoder >general >custom codec.A dialog box will appear for the navigation of the codec pack. Now open the folder in which the codec pack is installed. You will see the zip file: click on it.If you have selected the right zip file, the App will restart. Which MX Player codec supports AC3 video? The neon codec is the best choice if you want to play AC3 video. When to you MX Player AIO Codec? Please note that, if you have chosen to go with the All-in-one codec pack, the MX Player will automatically install all the codec in the zip file. Once the app restarts after installation, you would be able to play videos with DTS Audio, AC3 audio without any issues. Hope this article, helped you find the perfect MX Player Custom Codec for your need. If you have any issues downloading or install MX Player Custom Codec, do drop a comment below and we will get back to you at the earliest. A fully customizable multimedia player Loads of Ukrainian TV channels Series, movies, cartoons, and much more Dairy App & Notes & Audio Editor & Voice Recorder The music player for Xiaomi Compress videos and pictures in a matter of seconds TED conferences on your cell phone Edit and share photos, anywhere MX Player is a free media player app for Android and iOS smartphones specializing in videos but also capable of playing audio. The latest updates work on iOS smartphones and Windows PCs. It can reproduce videos in Full-HD and 4K/Ultra HD quality, and it reads, edits, and syncs subtitles. It supports all video and subtitle file formats.Tricks for optimum video viewing on your phoneIhe smartphone is becoming the most versatile tool for everyday living. You can do almost everything on your phone nowadays. Portable in your pocket, backpack, or purse, smartphones are now indispensable for business and leisure in modern society. Video streaming sites are rising in popularity faster than the television did back in the 1960s. You can watch full movies and series on your phone streaming from popular sites like Netflix, Hulu, Disney+ and Gaia. Watch and share live videos on YouTube or Facebook. Get gaming tips from Xbox Live and PlayStation Live. Take videos of your favorite moments with your phone camera and upload them for your friends to see. You need a media player app that can keep up with your digital world. MX supports all video formats including MP4, AVI, 3GP, WMV, MKV, and others. It can read and edit subtitles in SSA/AASS, SRT, TXT, and VTT file extensions. If you want to upgrade your ad-sponsored free MX Player for Android to the one-time payment, ad-free MX Player Pro, you can get uninterrupted video viewing with the app's basic functions. As this new version is still in development, it won't support all online video streaming sites in certain regions. The best gesture control on smartphones With its new HW+ decoder for hardware acceleration, and its multi-core decoding for better playback performance, the MX Video Player accepts many gestures for easy action control. Pinch to zoom in, expand to zoom out, swipe across the screen to pan, and tap to play or pause. Get more options with the hard-press secondary menu. The MX Player loads all the videos on your phone to its library upon installation. Access all your videos from one application, no matter their format. You won't have to worry about your children messing up your phone or opening apps they shouldn't while watching videos. The Kids Lock function lets parents lock the screen on the video currently playing so that random gestures won't stop the video, close the app, open a new application, or change phone settings. You can take out the Kids Lock by tapping on a specific point on the corner of the screen. For subtitles, scroll forward or backwards to see the next or previous text, scroll up or down to move the next and pinch or expand (zoom in/out) to change the size of the text. The app supports subtitles in several languages, and you can edit the text properties such as size, color, and outline. This media player needs permissions Different apps need different permissions so they can access certain features on your smartphone. You must give all the following permissions to install the MX Player: Location to find friends for video transfers and secure streaming access, and Bluetooth for AV sync and file transfer. Read and write external storage to run your media files and rename or delete videos and save downloaded files. Network, Wi-Fi, and Internet for downloads, updates, and direct streaming. Camera to create your own videos. Vibrate for notifications and control of feedback due to phone vibration. It can be somewhat tedious to have to accept each permission as it comes out on the screen for you to be able to install the app. The installer has trouble loading all the right functions if you refuse to give permission. Tap on 'Accept' every time the system asks, for it not to cancel the download. Sharing videos with smartphone-incompatible friends Do you feel that you can't share videos with your friends because you have an Android and they have iPhones, or vice-versa? Sharing videos doesn't have to be hard. There is an easy way you can share videos you took with your phone camera so that anybody can watch them, even if they have a different operating system on their phone. If you upload your videos to Google Photos, you will get a link that you can share with all your friends via text message, email, WhatsApp, Skype, or social media apps, so they can download the video wherever they want. Most smartphones have Google Photos preinstalled, but if you don't have it, you can get the app in the Google Play Store or the iOS App Store. Google privacy settings make it safe and user-friendly. Don't shun your friends because of their phones. There is an easy way for all to share your favorite moments.The leading media player for smartphonesThe MX Player for Android and iPhone is ad-supported freeware that can play any video file with or without subtitles in many languages and formats. It's an excellent tool for running video or audio files downloaded from the Web, taken with your phone camera, or played from video streaming websites. The app requires many permissions for optimum performance, and won't install on all smartphones. In case your phone cannot support the application, even with an APK file, you can try KMPlayer for smartphones and Windows, or VLC Media Player for Windows, Android, Mac, and iPhone.
